DevOps / Cloud Engineer

Professional Summary:

Cloud-focused Cloud Computing graduate student with hands-on experience in **DevOps engineering, AWS cloud deployments, Docker, Kubernetes, CI/CD automation, and Python development**. Currently pursuing a Master's degree in Cloud Computing at the National College of Ireland (NCI), Dublin, while delivering cloud-native projects involving **containerised microservices, Infrastructure-as-Code using Terraform, and automated deployment pipelines**. Strong understanding of Agile delivery models, cloud architecture fundamentals, and application modernisation strategies. Engaged in hands-on MSc course projects involving cloud deployment, CI/CD automation, and application development, and open to new opportunities. Available for part-time / internship now; full-time from February 2027.

Technical Skills

Category	Technologies
Programming Languages:	Python, Bash, SQL
Cloud Platforms:	AWS (EC2, S3, IAM, CloudFormation), CloudWatch
Containers & Orchestration:	Docker, Kubernetes
CI/CD & Automation:	GitHub Actions, Jenkins
Infrastructure as Code:	Terraform, YAML
Web & APIs:	RESTful APIs, HTML, CSS, JavaScript
Databases:	SQL, PostgreSQL
Monitoring & Logging:	Prometheus, Grafana
Version Control:	Git, GitHub
Operating Systems:	Linux, Windows
IDE / Tools:	VS Code, Postman

Professional Experience

National College of Ireland (NCI), Dublin.

Sep 2025 – Present

Graduate Programme Projects

Project Description: Designed and implemented cloud-native applications as part of MSc coursework, focusing on containerisation, CI/CD automation, and AWS-based deployments.

Responsibilities:

- Developed and deployed **cloud-hosted services using AWS** (EC2, S3, IAM, CloudFormation).
- Built and managed **Docker containers and Kubernetes deployments** for microservice workloads.
- Designed automated **GitHub Actions pipelines** for build, test, and deployment workflows.
- Provisioned infrastructure using **Terraform** and Kubernetes YAML manifests.
- Implemented **monitoring and logging** for containers using Prometheus and Grafana.

Environment: AWS, Docker, Kubernetes, GitHub Actions, Terraform, Python, Linux, YAML

Personal AI Assistant — Telegram Bot

2025 – Present

Personal Project | github.com/Jaipalreddy2/personal-assistant

Project Description: Built a 24/7 AI-powered personal assistant Telegram bot integrating Gmail, Google Calendar, LinkedIn job automation, and Claude AI for natural-language interaction.

Responsibilities:

- Engineered an automated **LinkedIn Easy Apply pipeline** using Playwright that searches, filters, and applies to 60+ graduate and DevOps roles in Dublin.
- Integrated **Gmail IMAP** for real-time priority email monitoring and smart alerts.
- Connected **Google Calendar OAuth** for scheduling, event creation, and daily briefings.
- Built a **Claude AI resume tailoring module** that rewrites bullet points to match each job description before applying.
- Deployed on Windows with persistent background process management and auto-restart on boot.

Environment: Python, Claude AI API, Playwright, Telegram Bot API, Gmail IMAP, Google Calendar API, SQLite, Git, Windows

CI/CD Pipeline — Python App Deployment to AWS EC2

2025

Personal Project | github.com/Jaipalreddy2/cicd_project1

Project Description: Implemented a fully automated CI/CD pipeline using GitHub Actions to deploy a Python web application to AWS EC2 with zero manual deployment steps.

Responsibilities:

- Configured a **GitHub Actions workflow** triggered automatically on every push to the main branch.
- Pipeline **SSHs into AWS EC2**, pulls latest code, installs pip dependencies, and restarts the Gunicorn server via systemctl.
- Used **GitHub Secrets** for secure SSH key and host credential management, eliminating password-based access.
- Documented deployment processes and wrote reusable YAML workflow configuration.

Environment: GitHub Actions, AWS EC2, Python, Gunicorn, SSH, Git, Linux, YAML

Education:

Master of Science in Cloud Computing

National College of Ireland (NCI) — Dublin, Ireland

Sep 2025 to Sep 2026

Bachelor of Technology in Computer Science

CMR Institute of Technology — Hyderabad, India

2020 to 2024
